

## **STOP WORK POLICY**

### **3<sup>rd</sup> EDITION**

Crescent Subsea Engineering (CSE) believes that none of the work or operations performed by us is so urgent that it cannot be done safely and still achieves the required results.

The company has in place this STOP WORK POLICY towards the objectives of providing:

- A safe and healthy working environment
- Protecting the environment
- Minimising the risk of damage to property and equipment

Each employee and regular contractor is given the authority by CSE Board of Directors to STOP WORK in any situation where that person, in his or her honestly felt opinion, observes any work to be unsafe for reason of:

- Unsafe act
- Unsafe equipment
- Safety procedures not being followed

Each employee and regular contractor is a STOP WORK AUTHORITY and may use this at any time as direct authority to STOP WORK. Those persons to whom STOP WORK is directed are required to STOP WORK until it is made safe to continue.

A handwritten signature in blue ink, appearing to read 'Chris Aylward', with a stylized flourish at the end.

Chris Aylward  
Group Chief Executive
