

EQUIPMENT MANTAINENCE POLICY

3rd EDITION

To help ensure continued effective personal safety at Crescent Subsea Engineering managed and operated worksites all equipment is required to be maintained and certified fit for purpose by a competent person. It shall be serviced and managed through the companies "**PLANNED PREVENTATIVE MAINTENANCE SYSTEM**".

Crescent's policy regarding the use of personal equipment is set out below. This applies to all mining operations managed and operated at the company's worksites.

No privately owned or personally supplied safety critical equipment shall be permitted for use.

In order to support this policy Crescent Subsea shall provide trained, certified and competent personnel to service and maintain safety critical equipment in accordance with Crescent Subsea Engineering's standards, procedures and best industry practice.

A handwritten signature in blue ink, appearing to read 'Chris Aylward', with a long horizontal stroke extending to the right.
